

Second Half of “A”-9 – LZ’s notes on Spinoza’s *Ethics*

Reference notes as listed in LZ’s fair copy (PZ Archive), checked against and slightly augmented by those on the draft manuscript (HRC 3.1 & 2). An identical list of source references was also sent to Lorine Niedecker (1950?). The fair copy does not include the coda and the first reference given is all that is noted on the draft manuscript. The additional references for the coda are from a working list among the draft notes, with the line numbers assigned to the latter as the editor’s best guess.

LZ’s edition: Benedict de Spinoza, *Ethics* (including the *Treatise on the Correction of the Understanding*), translated by Andrew Boyle, Introduction by George Santayana (Everyman’s Library, 1910).
